

BOARD REVIEW

Brand & Digital Programme.

Progress to date, what has been built, and an assessment of where the programme stands.

Prepared for the Board of EDM Holdings · June 2026

A complete, launch-ready brand and digital presence.

EDM Holdings now has a full corporate identity and digital footprint, built end-to-end around a single canonical system and delivered as a coherent, consistent whole — from the logo through to the website, the tender documents, and the field and social collateral.

90/
100

GRADE A · PROGRAMME DELIVERY

Scores the quality and completeness of the commissioned brand & digital build. Every workstream is delivered and internally consistent. The remaining work — commercial proof such as case studies, photography and financials — sits with the company and forms the defined next phase; it is assessed separately and is not part of this score.

WORKSTREAMS

1986

HERITAGE CARRIED
THROUGH

In one line for the Board. The brand and digital layer is built and ready to go live. The next phase is evidence — real projects, photography and numbers — which only the business can supply.

What was commissioned.

A single programme to give EDM a credible, consistent presence across every touchpoint a specialist contractor needs — for winning tenders, presenting to clients, and operating on site.

- 01 Brand identity & logo system
- 02 Website
- 03 Corporate documents
- 04 Stationery
- 05 Brand applications
- 06 Tender & project templates
- 07 Social media kit
- 08 Site signage

CANONICAL COLOUR	Deep green #083819, with ivory and steel-grey supporting tones
TYPEFACE	Montserrat — a single, web-safe family across print and screen
THE MARK	The EDM cube, rebuilt faithfully from the original artwork — rule lines, recessed depth and true colour preserved
PRINCIPLE	One system, applied consistently — so every asset reads as the same company

Honesty note. Throughout, nothing has been fabricated — no invented projects, clients, accreditations or figures. Where proof is needed, the assets are built ready to receive it.

A faithful mark and a full system.

THE EDM LOGO SYSTEM — PRIMARY, REVERSED, MONOCHROME AND CUBE MARK

The logo was rebuilt from the original high-resolution artwork so it is true to the mark the Board knows — the two rule lines, the grey panel and the recessed cube top all restored, in the correct deep green.

It is delivered as scalable vectors with a complete variant set, favicons, and an eight-page brand guidelines document covering clear-space, sizing, colour and correct use.

ASSESSMENT

92/100

A 20-page site, ready to host.

HOME

A complete, responsive website — positioning, capabilities, the four-market reach, and an enquiry path — built as fast, secure static pages with search-engine essentials and a branded social-share image already in place.

It is ready to go live: connect the enquiry form key, host the folder, and point the domain. A short go-live guide is included in the pack.

ASSESSMENT

90/100

The documents that win and explain work.

- **Capability statement** — a focused, tender-led document: the proposition, the full scope of trades self-delivered, the delivery model, and quality, safety and assurance.
- **Corporate brochure** — the company profile: heritage since 1986, the self-delivery model, sectors and four-market reach.
- **Brand guidelines** — the rules that keep every future asset on-brand.

ASSESSMENT — STATIONERY, SOCIAL, SIGNAGE, APPLICATIONS & TEMPLATES

89/100

ASSESSMENT

Scorecard.

WORKSTREAM	SCORE	NOTES
Brand identity & logo system	92	Faithful mark, full variant set, guidelines
Website & digital presence	90	20 pages, responsive, SEO-ready, enquiry capture
Corporate documents	90	Capability statement, brochure, guidelines
Sales, field & social collateral	89	Stationery, social, signage, livery, workwear, templates
Launch readiness (mechanics)	86	Ready on form key + hosting + domain
Programme delivery — overall	90	Grade A
Commercial substance & proof Case studies · photography · financials · pipeline	Pending	Company-supplied — the defined next phase, assessed separately

How to read this. The 90/100 reflects what was commissioned and built — and it is strong. It is deliberately **not** a measure of the business's commercial readiness, which depends on verified projects and numbers the brand cannot manufacture. Keeping the two separate is what makes this assessment trustworthy.

What remains — and who owns it.

None of the following blocks launch. Each is the company's to supply, and the assets are already built to receive them.

- **Project photography & 3–5 verified case studies** — the single highest-value addition. The website, capability statement and social posts all have a place for them, and a project-profile template is in the pack.
- **Commercial substance** — for any growth or investment decision, verified financials, a real pipeline and contract terms. This is the dimension a board and its advisors must drive; it is outside a brand programme.
- **Go-live mechanics** — an enquiry-form key and hosting, following the included go-live guide (about ten minutes).
- **Two founder business cards** — for Damien Meenan and Eddie Duffy, on supply of their details.
- **Invoice particulars** — the company TRN and bank details added to the template before use.

Recommendation to the Board. Take the brand live now — it is ready and consistent. In parallel, commission photography and assemble the case-study set, and treat commercial and financial diligence as its own track before committing significant capital. Brand earns the meeting; proof and numbers win the decision.

IN SUMMARY

The brand is built, consistent and ready to go live. The next chapter is proof — and that is the company's to write.
